

New Products

User Guide

Thanks you for purchasing this extension.

I. Installation Guide

Please make sure your Magento store comes ready before you integrate our extensions. If your store has not been available yet, get it quickly following [Magento Installation Guide](#)

You just need follow steps below to get our extensions ready for your Magento store:

1. Upload folders **app**, **js** and **skin** from our download package to your Web server's document root (from here on, referenced as *{docroot}*). These files will overwrite default folders **app**, **js** and **skin** in your Magento folder, you should see a directory layout like this:

```
{docroot} /magento/app/  
index.php  
js/  
lib/  
LICENSE.txt  
media/  
pear/
```

skin/

var/

2. Login your Magento Admin area (ex: access Magento Admin area on a stage localhost: <http://localhost/magento/index.php/admin/>)

3. Navigate to Magentothem > New Products > Configuration. You will see installed New Products Slider extension, click extension's name tab to go to extension configuration page.

II. Configuration

1. Please make sure **New Products** module get installed properly

2. Login your Magento Admin area

3. Navigate to **Magentothem > New Products > Configuration** and configure default criteria as per screenshot below:

New Product

You need set product to display slider, please follow steps:

Go to **Catalog > Manage Products > Select product > set “Set Product as New from Date” and “Set Product as New to Date”** (Attribute set new product).

 **My Computer (Computer)**
Back
Reset
Delete
Duplicate

General

Name *	My Computer
SKU *	Fixed <div></div> mycomputer
Weight *	Fixed <div></div> 10.0000
Status *	Enabled <div></div>
Tax Class *	None <div></div>
URL key	my-computer <input checked="" type="checkbox"/> Create Permanent Redirect for old URL
Visibility *	Catalog, Search <div></div>
Set Product as New from Date	06/1/10 
Set Product as New to Date	06/2/15 
In feed	No <div></div>
Featured	No <div></div>

You can repeat steps above to configure **new attribute** for other products

4. Default the new products slider display in content cms homepage.

If you want change position display module you go to

app/design/frontend/default/default/layout/newproductslider.xml

Then change reference

```

<reference name="content">

    <block type="newproduct/newproduct" name="newproduct"
template="magentothem/newproduct/newproduct.phtml" />

</reference>

```

To

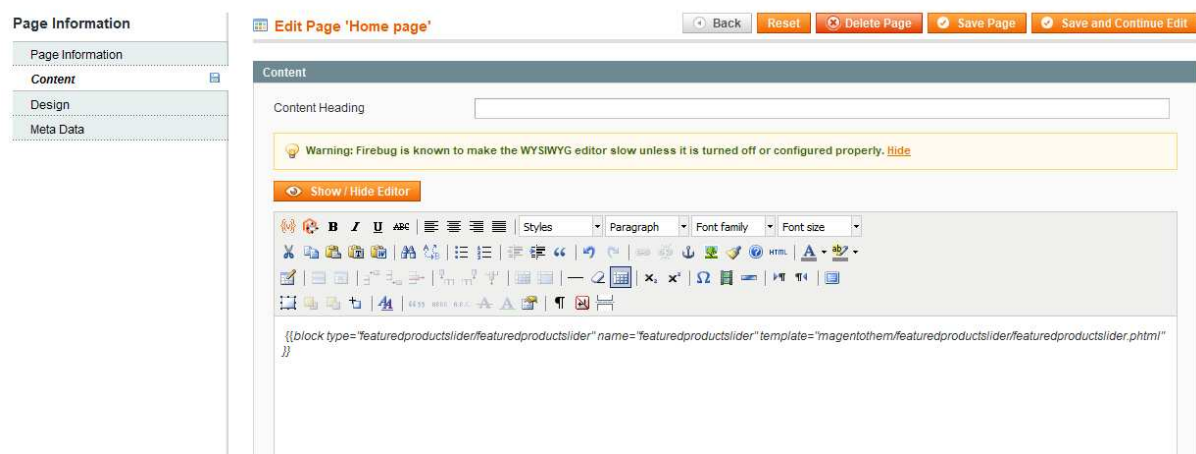

```
<reference name="New position">
```

```
    <block type="newproduct/newproduct" name="newproduct"  
    template="magentothem/newproduct/newproduct.phtml" />
```

```
</reference>
```

If you want the extension display on **cms page** or **static block** you can using command:

```
{{block type="newproduct/newproduct" name="newproduct"  
template="magentothem/newproduct/newproductslider.phtml"  
}}
```

The extension will be displayed frontend:

Now see how it work on live demo
